Vision-Sciences to Discuss EndoSheath® Technology on "Taking Stock with Pimm Fox"

ORANGEBURG, N.Y., March 17, 2014 (GLOBE NEWSWIRE) -- Vision-Sciences, Inc. (Nasdaq:VSCI), a leading provider of unique flexible endoscopic products utilizing its proprietary sterile disposable EndoSheath® technology, is pleased to announce that Cheryl Pegus, M.D., President of Caluent, Director and Strategic Advisor of Glytec, and the Lead Independent Director of Vision-Sciences, will appear on a segment of the Bloomberg News TV show "Taking Stock with Pimm Fox" on Wednesday, March 19, 2014 during the 5:00 - 6:00 PM EDT hour.

"We are thrilled that Dr. Pegus will have the opportunity to discuss Vision Sciences' innovative Endosheath technology on *Taking Stock with Pimm Fox*," said Lewis C. Pell, Chairman and Co-founder of Vision-Sciences. "Our technology has become even more relevant in light of the recent focus on hospital-acquired infections and the steps the healthcare industry needs to take to help prevent these infections from developing."

Vision-Sciences' patented and FDA-cleared EndoSheath technology is the only flexible endoscopic technology on the market with a sterile, single-use barrier which prevents direct contact with the patient and reduces the difficulties of providing a sterile, patient ready device. In 20 years and with over 5 million procedures performed with EndoSheath technology, Vision-Sciences has never received a report of patient-to-patient cross-contamination.

Segment Details:

Date: Wednesday, March 19, 2014

Time: 5:00 - 6:00 PM EDT

Outlet: Bloomberg News TV "Taking Stock with Pimm Fox"
